ERAM GROUP

# Turn key Services from Eram Agnice Engineering

## FIRE EPC Services Including

- Fire Risk Evaluation
- System Design & Engineering
- Quantity Surveying
- Procurement
- Mechanical Fabrication & Erection
- Testing and Commissioning
- Maintenance and Support

## MEP Services Including

- Plant Construction
- Pipe line Construction
- Structural Construction
- Electrical & Instrumentation works
- HVAC System Installation
- Plumbing & Drainage Services

# Turn key Solutions from Eram AgnICE Engineering

## Fire Detection & Alarm Systems

### High Sensitivity Smoke Detection Systems, including:

- Photo Electric Smoke Detection
- Ionization Smoke Detection
- Beam Detectors
- VESDA

### Heat Detection Systems, including:

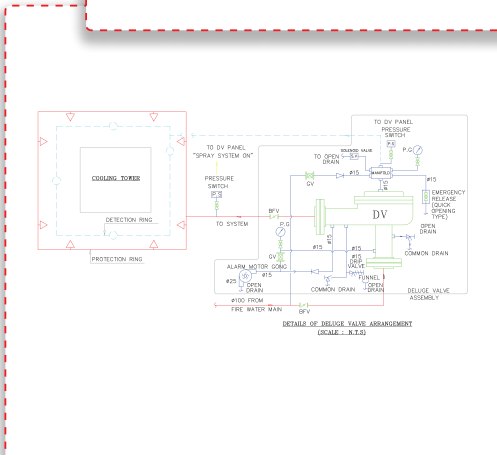

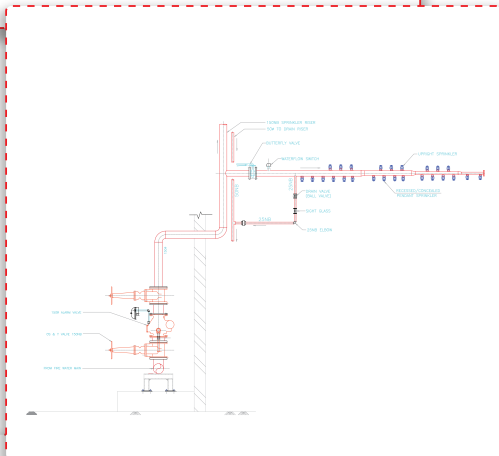

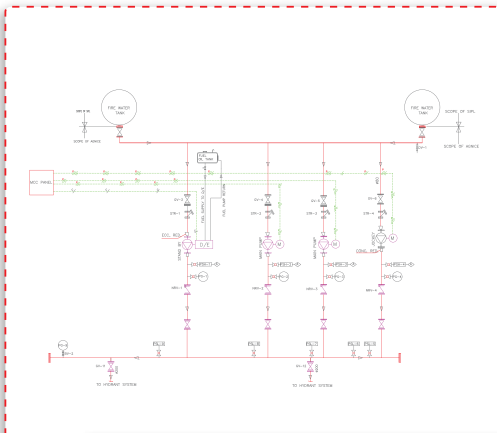

- Fixed Temperature Heat Detection
- Rate of Rising Temperature Heat Detection
- Probe Type Heat Detection
- Linear Heat Detection

## UV/IR Flame Detection Systems

Toxic Gas Detection, including Hydrogen Gas Detection and Hydrogen Sulphide Gas Detection.

## Fire-Fighting Systems

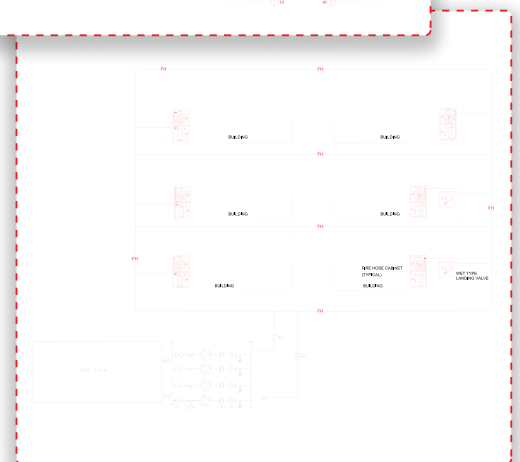

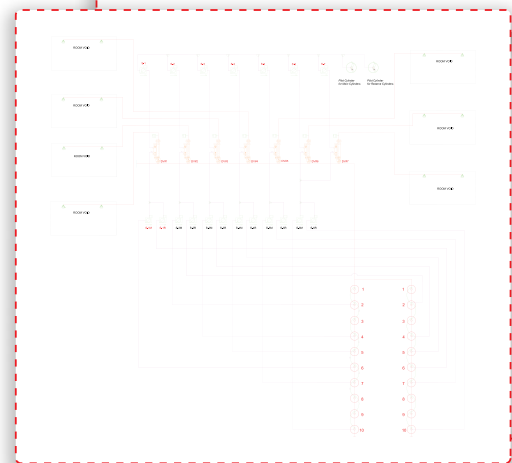

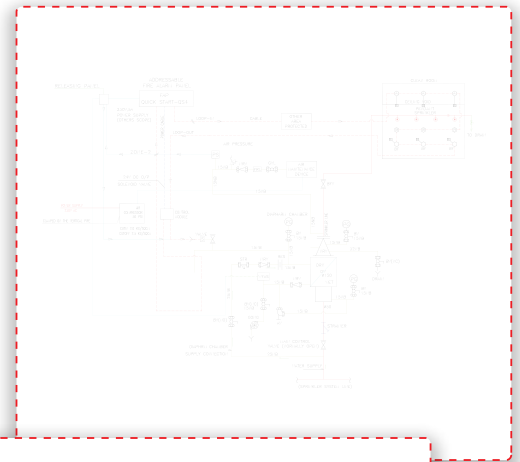

- **Hydrant Systems**  
A semi-automatic system, consisting of pressurized waterlines through pumps, which is recommended for use in all types of industries and commercial establishments.
- **High Velocity Water spray Systems**  
An automatic fire suppression system for special applications such as transformer protection, boilers, burner fronts and lube oil tanks.
- **Medium Velocity Water spray Systems**  
An automatic total flooding system for use in coal conveyor systems, cable galleries, LPG bullets and more...

- Foam Systems**  
 Used for oil fire applications, this system separates the fuel from the air by blanketing foam over the surface of the oil.
- Sprinkler System**  
 Used for localized fire applications, this system is ideal for use in factories, commercial buildings and the home.
- Deluge Systems**  
 Similar to an automatic sprinkler system, except all nozzles discharge together, this system protects areas where fire is likely to spread rapidly.
- Water Mist Systems**  
 By converting pure water into a fine spray mist, this environmentally friendly system extinguishes fire without hurting or damaging people or property.

## Fire Suppression Systems

- Inergen Systems**  
 Ideal for use in enclosures such as server rooms and control rooms, this system floods clean agent gases (N<sub>2</sub> and Ar) into the area at risk; extinguishing flames by lowering the oxygen level, whilst maintaining breathable conditions.
- IG100**  
 A colorless, odorless, electrically non-conductive gas with a density equivalent to air; extinguishes fire by reducing the oxygen concentration within the area at risk.
- HPCO<sub>2</sub>**  
 An automatic gas suppression system used mainly in unmanned areas such as oil cellars, hydraulic rooms and automated paint shops.
- LPCO<sub>2</sub>**  
 A total flooding system for use in areas where CO<sub>2</sub> is held at -18°C at 20- 25 bar pressure.
- Sapphire Systems**  
 A clean agent system that uses Novec 1230 fire protection fluid to quickly suppress fires and protect sensitive equipment without damaging the environment.
- FM200**  
 A clean agent system that uses HFC227 fire protection fluid to quickly suppress fires and protect sensitive equipment without damaging the environment.
- DCP Skid Systems**  
 For use in extinguishing fire involving bulk chemical agents, liquefied gases.

# EPC Capabilities

Excellent engineering skills, uncompromising quality control and sizable project team focussed on erection and commissioning.

## ENGINEERING CAPABILITIES

Manned by highly qualified design professionals with excellent capability in the following area

- Pre-Bid Engineering
- Design, Detailed Engineering, Hydraulic Calculation
- Supply Chain Management Using Customised Software
- Fabrication & Installation
- Testing & Commissioning
- Training & Operational Support
- Maintenance Support and Upgrading of Existing Systems

## EXCELLENT CAD FACILITIES

- AutoCAD
- Pipe net
- Sprink cad
- CO2 flow calculation
- Inert Gas Flow Calculation Software
- FM200 Flow Calculation Software from Tyco(Hughes associates Inc-Fire Service & Egg)

## CAPABILITY FOR IN HOUSE ASSEMBLY

- Custom Built Control Panels
- Control cum Annunciation Panel
- Motor Control Center
- Diesel Engine control Panel cum Battery Charger
- Diversion Dampers
- Y Type Strainer
- Basket Type Strainer
- CO2 System
  - Frame Assembly
  - Manifold
  - Discharge Nozzles
  - Online weighing Unit
  - Selector Valves
  - Gas Release Panels

ERAM CONTRACTING EST.  
P.O. BOX. 76629 AL KHOBAR 31952  
SAUDI ARABIA

Dear Sir:

Thank you for your interest in performing work under contract to Saudi Aramco. Your file now contains the required registration information.

It is important to note that this registration merely provides Saudi Aramco with current contact and other basic information about your company. This registration is different from contractor prequalification which is performed separately in connection with a specific contract or group of similar contracts.

The method Saudi Aramco uses to prequalify and select bidders for each contract depends on the contract's complexity and urgency in addition to the number of potentially qualified contractors for the required work. A brief explanation of Saudi Aramco's Bid Slate Development methods is available in the Contracting Policies and Procedures section of Contracting's Internet Website. Our Web Site address is as follows:

Web site: [www.saudiaramco.com](http://www.saudiaramco.com)

We would like to take this opportunity to remind you to regularly update your registration information with Saudi Aramco, at least once a year. Should you require information concerning your file with Saudi Aramco, please contact our Contractor Relations Group, R-A162, North Park #2, Bldg. #3301, Wing "A", Dhahran, Telephone Nos. 874-2328 or 874-2295; Fax no. 874-2310.

We appreciate your interest in doing business with Saudi Aramco and wish you the best of success.

Sincerely yours,
